### **DETAILED ACTION**

Claims 4, 6 and 9 appear allowable over the prior art of record and have been renumbered as claims 1-3.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3 November 2008 has been entered.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 3 November 2008 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Coppola on 12 September 2008.

The following examiner's amendment was originally presented in the allowance mailed 25 September 2008.

The application has been amended as follows:

1. Please amend line 6, page 1 of the specification by deleting "This application" and inserting in its place -- This application is a division of 10/342,905, filed 15 January 2003, now U.S. Patent No. 6,710,184 which --.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance. This invention relates to a crystalline ethyl acetate solvate of carvedilol. The novel and nonobvious aspect of this invention involves the specific crystalline form of the ethyl acetate solvate of carvedilol. The closest prior art of record fails to teach or suggest the instantly claimed crystalline ethyl acetate solvate of carvedilol as the crystalline forms of the prior art and the claimed ethyl acetate solvate of carvedilol differ in physical characteristics such as X-ray diffraction patterns of the crystalline solid. As Applicants' ethyl acetate solvate of carvedilol of the instant claims was an unknown substance, there were no known ways of making the claimed compound. That some other crystalline forms such as those disclosed in the prior art might have existed does not make obvious the particular claimed crystalline compound since there could have been no motivation to produce the claimed form when one was not known to exist.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**
